

Spring Cove Ranch

101 years 1919-2020

The same Angus cowherd, raised on the same Idaho ranch, by the same family for 101 years.

Angus Bull & Female Sale

Monday, March 9th, 2020

At Spring Cove Ranch, Bliss, Idaho 1:00 PM MDT

SALE DATE: Monday, March 9th, 2020

LUNCH SERVED at 11:30, SALE BEGINS at 1:00 PM MDT

LOCATION: Sale is held at Spring Cove Ranch, Bliss, Idaho.

Address for GPS: 269 Spring Cove Rd. , Bliss, Idaho 83314

Map & directions are on the back of this salebook and at

www.springcoveranch.com

LODGING: Amber Inn, Bliss, Id. : (208) 352-4411

Billingsly Creek Lodge, Hagerman, Id.: (208) 837-4822

Hagerman Valley Inn, Hagerman, ID: (208) 837-6196

VIDEOS : Sale cattle videos can be viewed after March 1 at www.springcoveranch.com

SALE ORDER: Cattle sell in catalog order . Buyers are invited to come to the ranch early and view the sale cattle.

DELIVERY:

- Bulls will be delivered with a 500 mile radius free of charge.
- Hauling of females is the buyers responsibility.
- Bull buyers who haul their own on sale day or the day after receive \$50 off your bull purchase. Tell the clerks when you check out.

CALVING EASE RATING:

*****5 Star bulls, double digit CED and zero or less for BEPD.

*****4 Star bulls, Top 50% CED and a BEPD of 1.0 or less.

*** 3 Star bulls, suitable for large heifers, BEPD 2.0 or less.

HEALTH & FERTILITY:

**All sale cattle have had 8 Way, 3X (birth,branding & weaning).

Vista Once two times (branding & weaning). Pink Eye vaccine and De-wormed 3X.

**Bulls were vaccinated with Fusogard for foot rot 2X.

**Bulls are freeze branded with their indentity and have an EID ear tag.

**All females are calfhood vaccinated for Brucellosis.

**All bulls have passed a thorough Semen/Breeding Soundness Evaluation by Dr.

Marty Bennett, DVM.

**All bulls sell with a negative Trich test or a Certificate of Virginity. Bulls selling to state requiring Trich Tests will be tested and delivered after the completion at no cost to buyers.

**All cattle have been BVD-PI3 tested negative.

**All registered cattle in the sale known to be potential carries for AM, NH, CA, D2, M1, DD, OH or OHP have been tested free or are otherwise noted.

FIRST BREEDING SEASON GUARANTEE:

- All bulls selling or \$3000 or more will be covered 50% by Spring Cove Ranch if they are injured during their first breeding season.
- Breeding season is defined as the 90 day period following the first turnout of the bulls.
- ½ of the purchase price less the salvage value, if any, will be credited to the buyer in a future sale or toward a replacement bull if one is available.
- All claims must be made by September 1st, and accompanied by a statement from a veterinarian.

TERMS AND CONDITIONS: Cattle sale under the Terms and Conditions of the American Angus Association. Except for those stated in the Terms and Conditions, there are no warranties, either expressed or implied, as to the merchantability or fitness of a particular purpose with respect to the cattle being sold in this auction. This warranties and guarantees set forth in the Terms and Conditions are in lieu of all other remedies provided therein shall be the sole and exclusive remedy of the buyer (or any party claiming through the buyer) or any breach or warranty or guarantee therein provided and all other obligations available at the clerks office on sale day. **LIABILITY:** All persons attending the sale at Spring Cove Ranch do so at their own risk. Spring Cove Ranch assumes no liability, legal or otherwise for any accidents that might occur on or about the premises. **RETAINED INTEREST:** We are retaining 1/3 revenue sharing interest in all the bulls. Possession and salvage value is 100% the buyers's unless otherwise stated. If we chose to collect semen, it will be done at the buyer's convenience and our expense. All announcements from the auction block will take precedence over statements in the sale books.

ICA MEMBERS DISCOUNT: Buyers who are member of the Idaho Cattle Association will receive a \$50 discount on each bull purchased costing \$3000 or more. ICA representatives will be at the sale to sign up new members and take membership renewals. Make sure and let the clerks know if you are an ICA member.

CAB Targeting the Brand Logo : You will see the "Targeting the Brand" CAB logo on many lots throughout the sale book. Animals must be at least breed average or better for marbling, EPD and \$Grid to qualify for this logo designation. See page 8 for more information.

ANGUS MEDIA Visit the *Angus Journal* Web site, www.angus.org and view this sale book online. *References: American Angus Association®, AHIR®, AngusSource®, CAB®, Pathfinder®.* EPDs current as of Jan. 31, 2020. Updated EPDs can be viewed online at www.angus.org. The American Angus Association does not generate nor endorse \$C numerical ranks (versus percentile rankings) until \$C numerical ranks are officially released.

YOU'VE DONE THE WORK.

Get paid for it.

You've invested in good genetics.
You've kept all the records.

AngusLinkSM combines USDA Process Verified Programs with a Genetic Merit Scorecard that gives buyers confidence in your calves. From age and source verification to cattle care and handling, you choose which programs make the most sense for you.

Group Age & Source: Verifies the group age and source of the cattle

Angus-Sired Genetics: Verifies calves are sired by 100% registered Angus bulls

Non-Hormone Treated Cattle: Verifies cattle have never received hormones

NeverEver³: No antibiotics, no hormones, no animal by-products ever

Cattle Care & Handling: Documents proper management, demonstrates quality commitment

Calf Management: Documents preventative health program

Genetic Merit Scorecard: Measures the genetic merit of calves for feedlot performance and carcass merit.

Easy and affordable, our customer service representatives walk you through the process.

To our Customers and Friends,

We are proud to present to you our culmination of 101 years of progressive Angus cattle breeding. Our ranch was grubbed out of sagebrush, along the Oregon Trail in Idaho in the early 1900's by Grandfather A.H. Butler who settled this dry, rocky, 8 inch annual rainfall desert in 160 acre Homestead Act parcels. He raised, sold and showed Percheron draft horses and registered Angus cattle across the West and his descendants have continuously raised registered Angus cattle on that same land since 1919. Each breeding decision beginning with grandfather, father and now us and our children and grandchildren has been made with the intention of improvement. Improvement of fertility, improvement of structure, improvement of udder quality & teat size and improvement of performance has always been our goal. The convenience traits of the Angus breed that my grandfather recognized in the first year he owned Angus cattle have always been of utmost importance. Traits that keep us all in business like calving ease, mothering ability, range-ability and moderate mature cow size. Stacy and I have deliberately tried to add marbling genetics to our cattle since the mid 1980's and after the first Beef Quality Assurance Audit came out in the early '90's we put more emphasis on it. We do all this while managing the herd much like commercial cattle ranchers do in our region. We don't try to maximize size or performance. We believe cattle need to fit the environment they run in and ours is arid, rocky and in some places steep making form and structure imperative. The Angus cow has provided a living for this family for 101 years and she continues to amaze us with her tenacity and endurance. Maternal instincts and calves that get up and go are imperative for survival in our western range outfit.

We feel it's imperative to personally evaluate each young sire purchased and AI sires used. This insures they meet our criteria for phenotype and possess the genetics to fit our western environment. We strive to improve form, function, durability and profitability with each and every mating decision. We proudly produce Angus bulls for commercial ranchers who need functional genetics that excel in carcass merit, calving-ease and maternal values. It's imperative that the genetics we introduce to our herd, and to your herd, meet strict criteria for phenotype and possess the genetics to fit our western environment. The bulls and heifers in this sale, along with their dams were raised "outside" and under the same western range conditions that many of you deal with. The bulls are developed at Spring Cove on a roughage diet with a minimum amount of grain. We strive for maximum fertility and longevity not maximum performance. This allows adequate growth yet keeps the bulls sound and functional and able to work and last in rough environments. We use all available tools to make our breeding decisions; DNA, performance, visual trait appraisal and EPD's but in the end **our goal is to make cows that keep us all in business**. We avoid extremes and look for balance.

AngusGS genomic DNA tests have been done on all of the bulls and heifers in this offering. This genomic information and performance data has been incorporated into the EPD's and increases their accuracy and reliability. We've done our job of getting the performance data reported in the proper contemporary groups and the DNA testing done so parentage is verified and the EPD's in this book are a real-time, current expression of the animals potential. The genomic data is like having the accuracy equivalent of 10 to 15 progeny from each individual; more than a lifetime of a cow's production. We use it as a tool in our attempt to increase the predictability of the genetics we sell.

Our 2020 offering is strong throughout the book. The majority of the sale cattle are out of herd bulls bred and or owned by Spring Cove Ranch and Triple L Angus. We have a great selection of heifer bulls, growth bulls, marbling bulls, and bulls that will leave behind daughters who will thrive in harsh environments and most of the bulls combine all these traits. The registered and commercial females offered this year are from the heart of our very best cow families.

All the bulls in the sale have been fertility tested, trich tagged and examined by Dr. Marty Bennett, DVM and have also tested negative for BVD-PI. Scrotal measurements will be available on a supplement sheet on sale day. Please note the "Calving Ease" score for the Angus bulls, printed next to the name of each qualifying animal. Calving ease bulls have been given a 3 to 5 star rank. "5 Star" bulls are considered competitive with a Longhorn without sacrificing growth, color or horns. "4 Star" bulls still possess exceptional calving ease potential, and "3 Star" bulls are still suitable for heifers with discretion. These ratings are based on genetics, genomics and our knowledge of the cow families and our assessment of the data for the individual, the dam and the sire.

A.H Butler plowing at SCR in 1919 with his home-raised team & baby daughter astride Jumbo.

AH Butler & Whitey at SCR 1950.

As we end this letter we feel it's important to note that the beef industry, in spite of making great improvement in quality still needs more high quality beef especially prime beef. In 2018, Certified Angus Beef identified 5.5 million head of Angus type cattle to supply 1.2 billion pounds of Certified Angus Beef sold. In doing so, packers sent an economic signal back to cow country to the tune of \$1.4 million per week in Certified Angus Beef premiums. As you study this catalog you notice the quantity of bull (78 %) that have earned the Certified Angus Beef Targeting the Brand logo by being breed average or better for Marbling EPD and \$G.

Lastly, we continue to provide assistance to our customers in marketing their calves and the Angus Association is making concentrated efforts to have commercial programs available to assist also. Ginette Gottswiller, Director of Commercial Programs for the American Angus Association will be at the sale to answer your questions about commercial programs available and Angus Link in particular.

The highlights of our Centennial year, 2019 were many. In early September, our new granddaughter, Isabelle O'Neil Helmick was born to Sarah and Chad. In late September, Art and I were humbled and honored to receive the Certified Angus Beef Seedstock Commitment to Excellence Award at the National Certified Angus Beef Conference in Asheville, NC and in November our herd was honored with a Century Herd Award at the National Angus Association Convention in Reno, Nevada.

We want to thank all of you for taking the time from your busy schedules to join us on sale day. **Thanks to our returning customers who have kept us going through the years and a big thanks to all the folks that help us get ready for the sale.** Please feel free to call us if you have any questions about the sale cattle. Videos will be posted on our website after March 1st.

Regards to the Bunch,

Art and Stacy Butler, 208-352-4332,
info@springcoveranch.com, Find us on Facebook www.springcoveranch.com

We were humbled and honored to receive the Certified Angus Beef Seedstock Commitment To Excellent Award in Asheville, NC in September of this year.

Receiving the Century Herd Award at the 2019 National Angus Association Convention in Reno, Nevada in November.

Dear Spring Cove Ranch,

Thank you for giving the following producers the opportunity to earn a premium on the cattle they sold by using registered and transferred Angus bulls purchased from your operation, they were able to enroll in a the American Angus Association's age-and -source verification program AngusSource.

Ruby Ranches - 93 steers @515# received a \$25.00/cwt premium.

Ruby Ranches - 84 steers@570# received a \$13.50/cwt premium.

Ruby Ranches - 96 heifers@500# received a \$22.50/cwt premium.

Morgan Ranches - 80 steers @ 610# received a \$22.00/cwt premium.

Morgan Ranches - 137 steers @ 700# received a \$20.50/cwt premium.

Morgan Ranches - 77 steers @ 775# received a \$17.00/cwt premium.

Morgan Ranches - 80 heifers @ 600# received a \$20.00/cwt premium.

Morgan Ranches - 74 steers @ 650# received a \$18.50/ cwt premium.

Flat Top Cattle (Greg Brown) - 180 steers @600# received a \$2.50/cwt premium.

Macon Cattle - 100 steers @ 625# received a \$6.50 premium.

Rabbit Creek Ranch - 106 steers @450# received a \$38.50/cwt premium.

Rabbit Creek Ranch - 91 steers @ 525# received a \$19.50/cwt premium.

Rabbit Creek Ranch - 113 steers @ 420# received a \$16.50/cwt premium.

AngusSource, the USDA Process Verified Program has served commercial cattle producers for the past 14 years. We want to thank you for helping you customers utilize AngusSource and reap the rewards associated with the program. Beginning January 2020, AngusSource will transition to AngusLink.

AngusLink is now the American Angus Association's USDA PVP program. We will continue with the same claims: Age and Source, NHTC, NeverEver3, Cattle Care and Handling, Angus-Sired Genetics and Calf Management. Additionally producers will have the option to add Genetic Merit Scores to their enrollment.

Last year calves enrolled in value added programs were definitely ahead of the pack. Take a minute to share that knowledge with the producers who purchase your bulls, and help them realize the benefits of adding AngusLink verifications into their operation.

Commercial producers have the option to utilize our online site which is emailed to more than 800 potential feeder cattle buyers when they use the marketing document and provide information the buyers want to know. Social Media is another method we utilize to advertise enrolled calves that are selling. Angus Link goes hand -in-hand with the Association's focus on providing comprehensive programs and services aimed at improving profitability in the commercial sector of the cattle industry.

Note : The letter above came to us from AngusLink in December of 2019. They announced the following new information on GAP certification in February of 2020:

"Producers seeking to document their added value on Angus feeder calves just got a more cost-effective option. EarthClaims, LLC, and the American Angus Association® have reached an agreement to provide bundled verification services. The bundled service includes certification under the Global Animal Partnership's 5-Step Animal Welfare Program (G.A.P.) certification from EarthClaims with options for age and source, Angus-sired genetics, non-hormone treated cattle (NHTC) and NeverEver 3 (NE3) verification by AngusLinkSM, a USDA Process Verified Program (PVP). By working together, the companies are able to streamline the enrollment and audit process while offering the programs at a reduced cost.

Ginette Gottswiller , Director of Commercial Programs for the American Angus Association will be at Spring Cove Ranch at sale time to answer any questions you may have .

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand. Only 3 in 10 non-parent Angus bulls meet the Targeting the Brand genetic requirements.

Minimum Genetic Requirements

	<i>Value</i>
Marbling EPD (Marb)	+0.54
Dollar Grid Carcass Index (\$G)	+46.0

*Hyline Right Time 338
*Spring Cove Liza 146

Reno currently ranks as the #1 bull in the Angus breed for \$W.

RENO was a high selling "Broken Bow" son in our 2015 bull sale going to David Rutan, Morgan Ranches of Jordan Valley, Oregon. He was used in their commercial herd AI and natural and then returned to Spring Cove Ranch for pasture service as a yearling and a 2-year-old. ST Genetics purchased RENO from Morgan Ranches and due to his untimely death, there is limited semen available. Reno's flawless phenotype, powerful maternal pedigree and EPD profile are elite and have caught the attention of performance breeders across the nation. The fabulous Spring Cove Liza cow family who produced Reno traces to cows born at Spring Cove Ranch in the 1920's and his dam Spring Cove Liza 021 is now a donor at Baldridge Bros Angus in North Plate, NE and his 13-year-old granddam, Liza 721 is still in production at Spring Cove. He ranks in the top 2% of the breed for WW, top 3% for YW, and top 3% \$M. RENO progeny will add growth and carcass quality while maintaining excellent maternal efficiency. Reno has been used widely and now has nearly 700 progeny on record. His EPD profile continues improve. Recent sales of Reno progeny include 1/2 interest in a son at Graber Farms in Indiana to ST Genetics and group for \$225,000, 1/2 interest in a Reno daughter sold at Crazy K Ranch to Spruce Mountain for \$90,000 and a \$65,000 Reno daughter sold at Spruce Mountain to Vintage Angus. Twenty-three Reno sons sell in this book and several grandsons.

We purchased a semen interest in BUB's Southern Charm AA31 in January in 2018 after seeing his progeny at the bull sale in Denver. A phenotypic favorite of visitors to ORlgen, this powerful young sire has been the leading sales bull at ORlgen for 2018. Produced by a dam whose first four natural calves recorded an average weaning ratio of 106, his granddam has five calves with an average weaning ratio of 113, and Southern Charm descends from a line of females with quality under structure and a high level of fertility that have a slick hair coat, good feet, ease of fleshing, and fescue tolerance. The females that produced him are very efficient cattle. As his Scrotal Circumference EPD predicts, Southern Charm collects and freezes extremely well and produces high quality semen that has yielded a far above average conception rate, and his sons have semen checked very well at 12 to 14 months. Charm is a proven Marbling and Maternal sire who now has 2,055 weaned progeny on record in 219 herds. Twenty-seven Southern Charm sons sell in this offering. Owned with BUBS Ranch of Koshkonong, MO, Sitz Angus Ranch of Dillon, Montana and Herbster Angus, Falls City, NE. Semen available at ORlgen.

BUBS Southern Son 33C "SONNY" joined our herd bull battery in 2018 as an outcross calving-ease sire. Josh found him on a trip to BUB Ranch and was impressed with his solid, muscular phenotype, good, hard feet and structural correctness. His first calf crop at SCR came unassisted and calves are vigorous and get up and go. "Sonny" is a three-quarter brother to the 2018 National Western Grand Champion Sale Bull BUBS Southern Joe, and he was produced by a Pathfinder Dam that combines the immortal maternal power of the Pathfinder Sires H A Image Maker 0415 and SydGen C C & 7. Look to "Sonny" sons to breed virgin heifers and to sire replacement heifers with the maternal heritage for both productivity and longevity. Owned by Spring Cove Ranch, BUB Ranch and Triple L Angus. Semen available through ORlgen.

JVC Cavalry has been described as one of the most athletic performance bulls in the business. He offers the genetic performance you need in a big BW to YW spread. His progeny have been well received across the country because of the stoutness, fleshing ability, structural correctness and broody design. Use Cavalry sons to add power, dimension and fleshing ability in one generation. Seven sons and 15 grandsons of V3326 sell in this offering.

"Longevity" defines our commitment to functional, convenient Angus traits that provide our customers genetics that meet high standards for performance, carcass, phenotype and maternal traits. He was our \$50,000 choice at Sitz Angus in Dillon, Montana in their 2013 offering. His sons are muscular and big nuttied and his proven daughters are easy-keeping, ideal Angus cows with beautiful under conformation. "Longevity" has spent six summers breeding cows "outside" on our southern Idaho summer rangelands. His progeny performance has earned him the rank in the top 15% of the breed for Marbling and \$M. Semen is available at ORlgen. Owned by Spring Cove Ranch, Triple L Angus and Sitz Angus Ranch.

CROSSBOW is sired by the balanced trait, Sire Alliance leader "Broken Bow" and was the high selling bull at \$20,000 in our 2015 sale going to ABS Global. His pedigree is an efficient blend of calving ease, growth and maternal and is complemented by his very correct structure, big top and extra rear muscle expression. Crossbow ranks in the top 1% CED, top 10% BW and top 10% \$B and top 10% Marbling. CROSSBOW progeny will lower birth weight, improve carcass weight, marbling and \$B while maintaining growth and maternal efficiency. His daughters are easy fleshing, moderate, maternal with excellent udder quality and look much like the "702" daughters. Crossbow is seeing widespread use in commercial heifer projects due to his ease of calving and vigorous calves. CROSSBOW semen is available through ABS Global. Owned by Spring Cove Ranch and ABS Global.

 Spring Cove Liza 149

"Compound" was purchased at our 2018 sale by Select Sires for \$35,000. With his double-digit CED and excellent growth and Marbling EPDs, he's an elite calving-ease sire with a lot of performance and end-product value. He was PAP tested by Select Sires while at Rocky Mountain Sire Services in Bennett, Colorado and posted a PAP of 37. His outcross pedigree brings a lot to the table from every angle - maternal advantage, top growth in WW and YW and several other traits that rank in the top 25% and better. Use COMPOUND to improve Marbling and bring that attractive look to your calf crop. Ideal mating on COMRADE and Consensus influenced females. Spring Cove Liza 913, sired by "Compound," sold in our 2019 Fall Online Heifer Sale to Pine View Angus in Iowa for \$21,000. Eight Compound sons sell in this offering. Semen available through Select Sires.

Stacy found "702" in the Canyon Creek Angus sale in Wyoming and he has made a lasting impact on the Spring Cove herd in the last 11 years and we will use him again this year. He adds calving ease with muscle without giving up carcass quality and fertility. Emblazon 702 sons will add pounds to your calf crop while keeping the replacement females easy keeping and moderate. His daughters have perfect udders and are designed to thrive on our western range. He is featured throughout this sale book as a sire or a maternal grandsire. Note that 702 daughters produced the three outstanding Spring Cove herd sires, CROSSBOW, RENO and PAYGRADE. CCA Emblazon 702 continues to gain popularity across the nation as commercial and registered producers alike calve his daughters. Sons sell as Lots 48-50 and 143. Semen available through Spring Cove Ranch. Owned by Spring Cove Ranch and Triple Angus.

D13 was the high selling bull at \$44,000 in our 2017 sale going to T/D Angus at Rishel's in North Platte, NE. We have been impressed with the muscle expression, good feet, structural correctness and style of "Cat" progeny. He is a low birth weight sire with above breed average weaning, yearling, marbling and ribeye EPDs. Owned by Triple L Angus and T/D Angus. Semen available through T/D.

Josh and Denise chose "Comrade 49" in the 2015 Rishel Angus Sale offering in North Platte, Nebraska where he was the high selling bull at \$34,000. His unique combination of muscle, phenotype and calving ease caught the eye of many astute cattlemen. "49" is pictured here in his working clothes after coming out of the breeding pasture. He's seen 5 years of heavy, natural use breeding cows and heifers on our rugged, dry, Idaho rangelands and he's as sound and functional as the day he arrived here from Nebraska. His moderate, gentle, muscular, trouble free progeny exemplify the convenience traits of the Angus breed and his balanced EPD profile is highlighted by CED+14, BW -2.1, \$EN +8.0 and top 10% \$M with above breed average Marbling and \$G. His sons produce calves that come unassisted and have excellent vigor. If you're looking for a sleep-all-night heifer bull to use in a western range operation, take a close look at the seven "Comrade 49" sons. Owned by Spring Cove Ranch, Triple L Angus and Rishel Angus.

Monumental is stepping forward to carry on the sire line that produced him with his powerful and athletic movement, superior length of body and overall eye appeal that made him an \$80,000 top-selling two-thirds interest bull of the 2017 Express Spring Bull Sale. Carrying on the power cow family descending from the record-setting G A R Precision 810 and her dam G A R EXT 614, his dam that stacks Ten X and the ORigen foundation female sire Summitcrest Complete and three natural calves with an average weaning ratio of 115 and an average yearling ratio of 113 and as her only calf scanned, Monumental recorded a %IMF ratio of 129. Seven Monumental sons sell in this offering.

Outstanding, 5 Star Calving Ease, herd sire prospect with excellent muscle shape, depth, length and structural quality.

Dam should go Pathfinder by sale time.

Dam was flushed once and still maintained 380 day calving interval.

Dam's 1st calf by Crossbow sold to JR Ranch, Othello, Washington at \$20,000.

"Soldier" exceeds his sire in nearly all EPDs and he ranks in the top 1% of the breed for CED, BW, WW, YW, CW and \$W.

"Soldier" will add growth and performance while maintaining moderate frame size.

American Angus Association \$Value Indexes

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires. Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

Combined Value (\$C), expressed in dollars per head, is an index which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid. EPDs directly influencing a combined index are: CED, CEM, WW, YW, Milk, HP, DOC, MW, Angle, Claw, DMI, Marb, CW, RE and Fat.
