EPD's Explanation	19

Thank you for your interest and support of our program. We do appreciate it.

The Dubs Family

Dear Friends,

The Dubs Family welcomes you to our 2023 Registered Angus Private Treaty Bull Offering. This is our 35th year of selling Registered Angus Bulls in Montana.

As in the past many years, we are feeding our private treaty bulls at our Bridger farm. Our sire selection includes Regiment, Wickwire, Niagara, Emerald, Value Added, Full Measure, Party Top, Movin On, Innovation Turning Point, Secure Innovation, Effective Innovation and Total Reliabull.

These bulls at branding received CattleMaster Gold FP5 and UltraChoice 8. Our pre-weaning vaccination program included CattleMaster Gold FP5-PI3-BRSV, Vision 8 Somnus with Spur, Endovac Beef and Dectomax Pour-On. After these bulls were weaned, they received Bovishield Gold 5, Vision 8 Somnus and Fusogard.

Our feeding program again was a high roughage ration to achieve a moderate gain to preserve structural soundness and fertility. That ration included chopped hay, silage and corn. We prefer not to push the bulls too hard while on the test and aim for an average gain of 3.2 pounds per day. On February 13th, we weighed the bulls off test and Dr. Lyle Bischoff of the Powell Vet Clinic fertility tested. That information is all in this catalog.

Twenty of the bulls were genomically tested through Angus GS. These "genomic enhanced" EPD's lead to increased accuracy.

We are proud of the progress we continue to make in carcass traits. Four of these bulls have a 1.0 or better Marbling EPD and two are over 1.0 for Ribeye EPD. In addition to EPD's and Genetic Testing, we tabulate and analyze actual Ultrasound Data. All the bulls were ultrasounded for marbling, ribeye, rib fat and rump fat by Eric Geving, Precision Ag Services, Cody, Wyoming. This information is on page 5.

We retagged the bulls with lot numbers and cataloged them by sire groups. We have included the cow tag number in the index. The cows are here at Bridger close to the barn and you are more than welcome to view them and their baby calves. Our cows summered on our dryland pasture 10 miles north of Columbus. Another trait we feel is very important is docility. People who help us with our cattle always comment what a tame set of cows we have.

Our 2023 Private Treaty Sales will open on **Saturday, March 18** at 1:00 pm. The bulls will be priced from \$2,500 to \$4,500. We will have a board in the barn with all the sale lot numbers. Please write your name by the Lot Number of any bulls you are interested in by 1:00 pm. If more than one person is interested in the same bull at 1:00, we will have a bid-off on that bull. Guidelines and

examples will be posted in the barn.

Please call us Saturday morning if you cannot be to the farm by 1:00 and we will write your name by the bull(s) you are interested in. You can participate in the bid-off over the phone if the need arises. Please give us a call with any questions. Cell phone service is not always dependable at the barn so please let us know ahead of time and we will be sure to call you before 1:00 when the sale begins. Our cell numbers are 406-208-8653 (Louis) and 406-208-8643 (Kathy). We will have coffee and donuts in the morning and lunch beginning at noon that day. Kathy and I and our family, Allison Dubs, Katrina, Adam, Reagan and Rhett Petersen, will be around all day to answer any questions you may have.

We look forward to seeing you this spring and hope you stop by to look at the bulls at your convenience. We appreciate your past support of our program.

Louis and Kathy Dubs

INFORMATION

Louis - Cell 406-208-8653

Kathy - Cell 406-208-8643

House - 406-652-7515

windingriverangus@gmail.com

WINTERING - Free wintering until May 1.

VOLUME DISCOUNT- We offer a 2% discount on 2 bulls, 3% on 3 bulls, 4% on 4 bulls and a 5% discount on 5 or more bulls purchased by the same person.

PERFORMANCE DATA - Birth weights, 205 day weaning weights, nursing ratios, dam's production records, yearling weights, average daily gain and projected March 18 weights are included in this catalog. All EPD's are current as of February 18, 2023.

FERTILITY - Dr. Lyle Bischoff, Powell Vet Clinic, Powell, Wyoming fertility tested the bulls again this year. The SC's are in the catalog and complete fertility exam reports will be available.

CARCASS and ULTRASOUND DATA - The bulls were ultrasounded on January 10, 2023 by Eric Geving, Precision Ag Services for carcass traits. The data was tabulated by the American Angus Association and that information is on page 5.

TEST and SALE SITE - The bulls are located four miles south of Bridger on Hwy. 72 on the west side of the road. The address is 1811 Hwy. 72, Bridger, Montana, 59014.

NOT RESPONSIBLE FOR ACCIDENTS

2023 BREEDING SEASON GUARANTEE

For those bulls that sell for \$3,000 or more, we will split the risk with you 50-50. This plan is good for the first 90 days after the bull is turned out. If he becomes injured during that time and cannot return to service, have your vet take a look at him and give you a written diagnosis/prognosis. The bull can then be sold for salvage. Take the amount you paid for the bull minus the salvage value and then divide that amount by two. That will be your credit for another bull. Please let us know as soon as possible but no later than 9/15/2023.

Example: You pay \$3,500 for the bull. He gets injured 45 days into the breeding season and the vet determines he is through and puts it in writing. You take him to the auction yards and salvage him for \$1,500. You send us a copy of the vet's letter and the ticket from the auction yards. We give you \$1,000 credit on another bull from us in 2023 if one is available or at next year's sale.

Amount paid for the bull	\$3,500
- Salvage value	<u>-1,500</u>
	\$2,000 ÷ 2 = \$1,000 credit

CAB Targeting the Brand

When going through the catalog, notice there are **11** bulls that earned the CAB Targeting the Brand logo. The Targeting the Brand™ logo is designed to highlight registered Angus bulls with greater genetic potential to produce calves meeting the most challenging specifications of the Certified Angus Beef® brand. Bulls must meet genetic requirements of **+0.65 Marbling EPD** and **+55 Dollar Grid (\$G)** to qualify for use of the Targeting the Brand™ logo.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the Certified Angus Beef® brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

For more information on Targeting the Brand™ visit CABcattle.com.

ULTRASOUND CARCASS DATA

Although genetic testing is a very important tool that we use, we also like to analyze the actual carcass ultrasound data because we believe that information is one form of enhancing performance records. Eric Geving, Precision Ag Services, Cody, Wyoming, ultrasounded these bulls as well as our replacement heifers again this year. When you look through the catalog you will notice that every bull has a positive EPD for both marbling and ribeye. The following shows adjusted ultrasound results for %IMF (Marbling), Ribeye and Rib Fat. Ultrasounding was completed early on January 10, 2023.

The six highest marbling and ribeye bulls are in bold.

<i>Lot #</i>	<i>IMF</i>	<i>Ribeye</i>	<i>Rib Fat</i>

Select Sires describes Movin On as an elite calving ease sire with a long square hip and extra depth of body and width. Along with calving ease, he passed on his ability to gain and excellent carcass traits to his son, Lot #20 who earned the "CAB Targeting the Brand" logo.

“TP” is a herd sire we raised out of Stevenson Turning Point. Looking at the bull, you would never think he is a low birth-weight sire but our numbers proved he is indeed that. We will use him again this year. Sire of #22-23, both earned the “CAB Targeting the Brand” logo.

Total Reliabull is a herd sire we raised out of Varilek Reliabull and a daughter of TC Total. Sire of #26.

EPD Explanations

Expected progeny differences (EPDs) have been around for almost four decades. They predict genetic transmitting ability of a parent to its offspring compared to other animals in the database. We did genomic testing on 20 of these bulls through the Angus GS program. This testing does improve the accuracy of the EPD's.

Calving Ease Direct (CED) is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk), expressed in pounds of calf weaned, predicts a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. It is that part of a calf's weaning weight attributed to milk and mothering ability.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Marbling EPD (Marb), expressed as a fraction of USDA marbling score, is a predictor of the difference in marbling of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (REA), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value and Beef Value. It also includes CED, CEM, WW, YW, Milk, HP, DOC, MW, Angle, Claw, dry matter intake, marbling, carcass weight, ribeye and fat.
